Career Objective

I'm Ahmad Essam. A very good front-end developer. Who seeking to work at a reputable company to develop and enhance their products with reusable and clean code.

Work Experience / Internships

- I do not have actual experience in the programming field. I did not land my first job as a programmer yet. So I worked hard on myself and created many websites to prove that I can code and get output. I need a chance to prove that. Kindly check my portfolio and my projects, from projects part.

- Have some experience in the customer service field. I did not mention it here because it's not related to this position. All details about my experience on my linked-in account which attached down.

Education

- Bachelor's degree in business management, Cairo University.

Projects:

- **https://jovial-ride-cee4bb.netlify.app** : This is the last project that I built. It's with Angular framework technology. Also, still improve myself in angular.

- **https://ahmadessam77.github.io/Movies-API/** : Movies API website, In this website. I was practicing on how to use APIs. How to send request or receive data from API. Also, I used the Regex expression to validate a form. Search function, and some jQuery animation.

- **https://ahmadessam77.github.io/Food-API/** : another example about practicing APIs, Food API website and still under development.

- **https://ahmadessam77.github.io/CRUDS-App/** : This is CRUDS program. I applied in this project concepts of (create, read, update, delete, and search) functions. I can manipulate JS and get a good output.

- **https://ahmadessam77.github.io/Bakery/** **:** The first website that I create before using bootstrap or any CSS tools/frameworks. This is a pure htm5 and CSS3 website.

- **https://ahmadessam77.github.io/Gallery-DOM-App/** **:** DOM gallery. I manipulated with DOM in this project. I can use DOM in JS well.

- **https://ahmadessam77.github.io/BookMarker-App/**

- **https://ahmadessam77.github.io/Egyptian-Party/**
